

Computer Aided Dispatch

RadioMobile IQ CAD 911

RadioMobile's IQ CAD 911 is a Computer Aided Dispatch system and software package built with state of the art design and database tools. In addition to performing all the basic CAD functions for call taking, fleet resource management, and report generation, IQ CAD 911 accommodates multiple platforms and addresses the changing needs of public safety.

IQ CAD 911 has multi-agency capability

IQ CAD 911 Features

- > Windows-based graphical user interface
- > Duplicate call filtering
- > Address validation
- > User-friendly
- > Integrated map (IQ Locator)
- > Drag and drop incidents to vehicles/crews
- > Emergency Alert interface to mobile units
- > Towing module
- > Report package
- > Personnel information including certifications and contact information
- > Vehicle status
- > Ability to interface with different vendors' RMS, map, and other products
- > Auxiliary file module (i.e. floor plans, mug shots, lost/stolen articles)
- > Easy administration
- > Minimal database maintenance
- > Available hot-standby server
- > No outage during backups
- > High fault tolerance
- > Virtually unlimited database capacity

Maximum Efficiency

When every second counts, IQ CAD 911 enhances the efficiency of emergency call center personnel by making vital information instantly available. Along with duplicate call detection, E-911 interface, and dispatch via map module, it also features paging alerts and SMS messaging to your PDA and MDC.

User Interface

Armed with IQ CAD 911's robust capabilities, dispatchers can be confident that they are delivering the best possible service to their callers. Use of mouse, hot keys, function keys, and command line allows flexibility based on user preference. Dispatch personnel also have individual choice of window layout, colors, and sounds.

Solid Design

In addition to being built with the most relevant CAD design and written with the latest software development technologies (Visual Studio 2008 and Microsoft SQL Server 2005), IQ CAD 911 offers high fault tolerance and virtually unlimited database storage capacity.

Vast Experience

When your agency chooses a RadioMobile solution, you also gain our experience since we become a part of your team. RadioMobile personnel have been delivering mobile data solutions for over 30 years and have been technology providers for public safety agencies since 1993.

Complete Solutions

IQ CAD 911 can be used in conjunction with other affordable RadioMobile software and hardware products such as IQ Mobile and the MCT-8000 to provide a complete mobile data management solution. RadioMobile also offers a variety of networking solutions.
